

design'tree® Chamfer Stool

Chamfer Stool

Designer

Designtree

The Chamfer Stool celebrates high quality materials and finely crafted design. The paired back elegance of the stool stems from a solid foundation of well balanced proportions and fine craft to give it a simple elegance. The stools name comes from the hard chamfers on the American Ash frame which flow around the soft internal corners balancing the design and accentuating the timber joinery.

The Chamfer Stool's simplicity and robust construction lends itself to a range of environments. The three heights that are available are suitable for a range of uses within both commercial and residential settings.

Materials

American Ash timber, 100% PET felt seat pad (minimum 60% recycled from post consumer waste).

Colours

Natural timber, dark grey seat pad. Other seat pad colours available on request.

Dimensions
