

Giddyup Rocking Stool

Designer Tim Wigmore

The Giddyup combines a fun and active way to sit, with the up-cycling of used leather saddles. A pre-loved, old worn saddle tells its story through the craft and care in its construction, the scuffs, marks and wear gained through its active use. This repository of histories and adventures is fixed to an elegant timber base to give the saddle a new life and the possibility of accumulating further stories.

The Giddyup combines the modern clean lines of its base with the inherent beauty and craft of the saddle to create a highly functional conversation piece.

Materials Re-purposed used leather saddle, solid American Ash timber or high grade plywood.

Colours Natural or black stain both with oil finish.

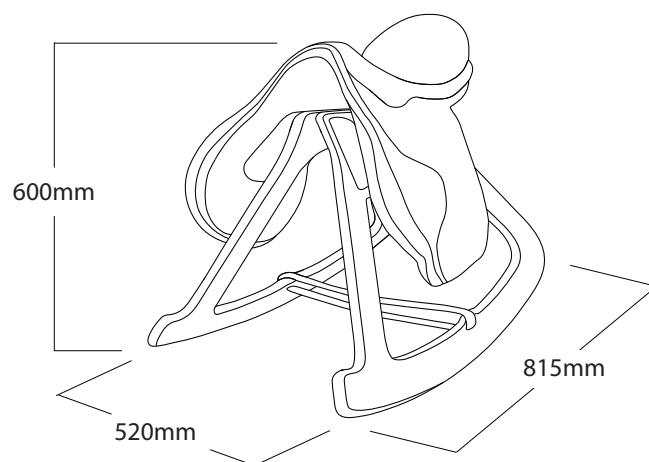

Dimensions H 600mm L 815mm W 520mm

Packaging H 680mm L 830mm W 540mm

Weight 11 kg (excl packaging)

Features

- FSC (Forest Stewardship Council) certified Plywood.
- Re-directing tired saddles from the waste stream
- The design allows the customer to easily attach their own saddle to the Giddyup base if desired.
- The timber is finished with a hard wearing non-toxic citrus oil.
- Comes flat packed to reduce its size for transport.
